ABOUT US

Agaoglu Aviation and Defence Industry, which was founded in 2011 to manufacture parts for the arms sub-industry, has been producing Sports Air Pistols and Air Rifles during the period and supporting other manufacturers in the sector with the standard parts it produces, has been continuing its activities by focusing on the light weapons sector since 2016.

In 2017, our company, which designed and produced two shutguns, the R-5 and AR 12 models, which are an original design, received a NATIONAL/NATO SECRET Facility Security Certificate from the Ministry of National Defense in order to produce rifled pistols and to organize our company to work as a main/subcontractor in defense industry projects.

In this context, we have started the production of rifled pistols. Our basic principle has been quality production and its continuity since the day we were founded. Our professional business approach is based on respect for people, society and the environment, honesty, efficiency and customer-oriented working consciousness, which are the principles and values that our managers and employees never compromise.
